

EDUCATION

Stony Brook University Master of Science in Computer Science (CGPA: 3.6/4.0) • Relevant Coursework: Algorithms, Operating Systems, Wireless Networks	Expected May 2026 New York, USA
University of Mumbai – Thadomal Shahani Engineering College (TSEC) Bachelor of Engineering in Computer Engineering (CGPA: 9.05/10) • Relevant Coursework: Databases, Computer Networks, Distributed Systems	May 2024 Mumbai, India

EXPERIENCE

Meta & Major League Hacking <i>Production Engineering Fellow</i> • Selected for a competitive 12-week, course-based Production Engineering fellowship with mentorship from industry-experts. • Built an open-source Flask-based portfolio template, automating deployment using Docker and CI/CD to enhance reliability. • Implementing Prometheus and Grafana monitoring for containerized services, ensuring real-time observability.	Jun 2025 — Sep 2025 Remote
Aumsat Technologies <i>Software Developer Intern</i> • Built a ground subsidence detection system processing 500+ geospatial datasets , enabling data-driven urban planning decisions. • Developed a scalable Flask backend with React.js dashboard in a Dockerized environment , ensuring seamless deployment. • Applied data replication and concurrency techniques to analyze 5 years of trends , improving predictive analytics accuracy.	Jun 2023 — Oct 2023 Mumbai, India

PROJECTS

Open Source Security Research – MetaMask • Researched Ethereum address poisoning, typosquatting, and domain drop-catching attacks affecting millions— 270M attempts . • Designed detection logic using address similarity, tx history, zero-value flagging, reducing phishing risk by 70% for targeted users. • Contributed mitigation strategies to MetaMask’s codebase, improving wallet safety and resilience against top phishing vectors.	Jan 2025 — Apr 2025
ZapMap Electric Vehicle Charging Station Locator <i>Flutter, Flask, Docker</i> Code • Designed a scalable EV charging platform with slot booking, serving 100+ stations at 98% uptime . • Engineered a custom A* pathfinding algorithm , cutting route calculation time by 60% vs. Dijkstra’s algorithm. • Integrated 3+ APIs (TomTom, eDRV, Stripe) for navigation, charger status, and secure payments with 99.9% availability .	Oct 2023 — May 2024
Rashi Pay - Offline Payment Interface (Smart India Hackathon 2022) <i>React Native, TailwindCSS, Express.js</i> • Built an offline digital payment app using Bluetooth , enabling 40% faster P2P transfers without internet. • Winner of Smart India Hackathon 2022 among 400 teams , delivering a cross-platform solution with React Native + Express.js. • Secured 10,000+ test transactions via 2048-bit RSA encryption , ensuring safe and reliable P2P payments.	Mar 2022 — Aug 2022
Alpha Trading <i>React.js, Firebase, TailwindCSS</i> Code • Developed a real-time paper trading platform with live updates for 500+ NSE stocks . • Achieved 85% prediction accuracy using an LSTM model for 30-day stock forecasting. • Optimized platform performance with efficient state management and real-time data streaming.	Dec 2021 — Mar 2022

TECHNICAL SKILLS

Programming Languages	Python, Java, C/C++, JavaScript, TypeScript, Kotlin, Solidity
Web & Frameworks	React.js, Next.js, React Native, Flutter, Express.js, Flask
Systems & Infra	Docker, Kubernetes, Nginx, CI/CD (GitHub Actions)
Monitoring & Tools	Prometheus, Grafana, Git, GitHub
Databases	MySQL, PostgreSQL, MongoDB, Redis, CockroachDB, Cloud Firestore
Cloud Platforms	AWS, Azure, Firebase

ACHIEVEMENTS

• Winner at HopperHacks 2025 (Best Overall Project) and HackNYU 2025 (Best Use of Streamlit) among 235+ projects .	2025
• Ranked top 20 at Harbinger 2.0 RBI International hackathon out of 363 teams from 22 countries for scalable blockchains.	2023
• Winner at Smart India Hackathon 2022 among 30,000 teams nationwide for developing an offline payments interface.	2022

PUBLICATIONS

• Published “A Cloud-Based Architecture for EV Charge Station Finder with Efficient Scheduling” at CSA 2024 Conference .	2024
---	-------------

LEADERSHIP EXPERIENCE

Google Developer Student Clubs (GDSC) TSEC - Community Lead • Led a 10-member team and organized 14 technical events for 600+ students, including workshops and hackathons.	Jul 2021 — May 2023
TSEC CodeCell - Committee Head • Organized 6 technical events including 2 editions of TSEC Hacks (200+ participants each).	Aug 2021 — Apr 2023
